Attached are pictures of the test that the EPA conducted today which we took co samples as well.

Jim Silver stated that he wanted to test the results of the Tymco sweeper.

The first sample we took was taken in block number 1 with 2 dots and was done before the Tymco made a pass over the area.

The second sample we took was the same block after one pass of the Tymco.

The third sample we took was block number 2 with 2 dots and was done after the same pass of the Tymco.
